

# FLOWMARK

## MARK-II COMMERCIAL ELECTRONIC WATER TREATMENT

EPA Est.#: 92852-FL-1

### FLOWMARK MODEL - MARK II

Treats Pipe Sizes 2"- 3"

### FlowMark Technology Overview

The FlowMark Water Treatment System is an electronic, non-invasive device that applies powerful energy pulses through the pipe which alters the normal scaling behavior of hard water.

The FlowMark signal causes calcium to precipitate in solution, passing harmlessly through the water system as opposed to building scale on plumbing and equipment surfaces.

FlowMark products are manufactured in the USA with top quality components and have an expected service life of 20 years.

- Nema 4X Water Resistant Enclosure
- Runs on 110 or 220 VAC
- Works on PVC, Copper, Steel and SS Pipes

### Protect your Equipment from Hard Water

- ◆ Prevents calcium scale from forming
- ◆ Gradually removes existing scale deposits
- ◆ Will work with or without softening systems
- ◆ Restores original flow and pressure
- ◆ Improves heat transfer efficiency
- ◆ Lowers maintenance and energy costs

### Some Commercial Applications

- ◆ Potable Water Systems
- ◆ Cooling Towers, Chillers and Heat Exchangers
- ◆ Fountains and Water Features
- ◆ Irrigation Systems
- ◆ Misting Systems
- ◆ Commercial Water Softener Pre-Treatment
- ◆ Restaurant and Laundry Applications
