

FLOWMARK

MARK-I PRO COMMERCIAL ELECTRONIC WATER TREATMENT

FLOWMARK MODEL - MARK I - PRO
Treats Pipe Sizes up to 1.5" Nema 4x

FlowMark Technology Overview

The FlowMark Water Treatment System is an electronic, non-invasive device that applies powerful energy pulses through the pipe which alters the normal scaling behavior of hard water.

The FlowMark signal causes calcium to precipitate in solution, passing harmlessly through the water system as opposed to building scale on plumbing and equipment surfaces.

FlowMark products are manufactured in the USA with top quality components and have an expected service life of 20 years.

- Works on PVC, Copper and Steel Pipes
- Municipal and Well Water

Protect Your Equipment From Hard Water

- ◆ External pipe coil wrap.
- ◆ Prevents calcium scale from forming
- ◆ Gradually removes existing scale deposits
- ◆ Will work with or without softening systems
- ◆ Restores original water flow and pressure
- ◆ Restores heat transfer efficiency
- ◆ Lowers maintenance and energy costs
- ◆ Consumes very little energy
- ◆ Makes Cleaning Easier

Don't Let This Happen To Your Equipment

Protect It With FlowMark
