

## FlowMark Chemical Free Cooling Tower Water Treatment

**Evapco Fluid Cooler**

**MK-III / DS-1 Combination System**

**Web Induction on 6" Riser**

### **Evaluation Period: March 2016 through August 2016**

In cooperation with Volusia County Schools HVAC Management, FlowMark Water Treatment of Daytona Beach, FL has successfully completed a 6 month paid trial to prove the validity of their Web Induction Pulsed Power and Advanced Oxidation Systems. All conventional chemical treatment was suspended during the trial period. The FlowMark chemical free system provided excellent scale and bacteria control while operating at high cycles of concentration to conserve water. Management was impressed and is now considering a chemical free water treatment bid for all schools.

**6 Months: Clean Tubes and Crystal Clear Water**

**Before: 200,000 CFU/ml.**

**After: <100 CFU/ml.**

**Bacteria Count Drastically Improved**
